

Letter to:

Admissions Committee

Date:

28 October, 2025

To Whom It May Concern:

I am pleased to recommend Leyla Ibrahimova, who volunteered under my supervision at the Rehabilitation Center for Cerebral Palsy at Bionur Medservice Hospital. As the Chief Doctor, I observed her dedication, maturity, and compassion throughout her time with us.

Leyla assisted our team by greeting patients, offering non-clinical support, guiding families, and helping maintain a calm environment in a challenging pediatric setting. She also helped comfort children during difficult moments, assisted with softening body and limb positioning before physiotherapy sessions, and supported parents during feeding routines for children with limited mobility. These tasks required patience, gentleness, and emotional steadiness, all of which she consistently demonstrated.

She additionally supported several long-term patients by maintaining simple notebooks that recorded their medication schedules after administration by the nursing staff. This improved patient understanding of care plans and helped reduce confusion or anxiety. Her attention to detail and clear communication made a noticeable difference to both patients and families.

Alongside her duties, Leyla independently studied the conditions commonly seen in our center, showing motivation and curiosity well beyond what is typical for her age. She approached every task with respect, responsibility, and thoughtful awareness of patient confidentiality.

Our staff valued her reliability, kindness, and calm presence. I am confident that she has the compassion and resilience needed for future medical training.

I recommend her without reservation. She will bring dedication, empathy, and strong motivation to any academic program.

Sincerely, Abdullaeva Gulbaxor Talatovna
